CONSULTING ENGINEERS

RADIO-TELEVISION

INTRODUCTION

The present firm of Cohen, Dippell and Everist, P.C. is a consulting engineering firm in the field of communications. This firm and its predecessors have been in business for more than seventy years, having had offices in the Munsey Building, Washington, D.C. from 1937 to September, 1979; 1015 15th Street, N.W. from 1979 to 1989, 1300 L Street, N.W., Suite 1100 from 1989 to 2010, and at present, located at 1420 N Street, N.W., Suite One, Washington, D.C. 20005. This firm is the only communications consulting engineering firm located in Washington, DC (just blocks away from the Federal Communications Commission). Donald G. Everist, a registered professional engineer, is President and Secretary. Julius Cohen, past president, retired from the partnership on December 31, 1992 and served as Chairman Emeritus until his passing on May 2, 1993. Ralph E. Dippell, Jr. remained active in the firm until his passing on October 30, 1992.

Julius Cohen was initially employed by Page and Davis, Consulting Engineers. The company's name changed to George C. Davis in 1942. Julius Cohen and Ralph E. Dippell, Jr., were employed by the firm, George C. Davis Consulting Engineers, before becoming partners in 1956. George C. Davis, the senior partner, retired in January, 1970. From 1970 to January, 1973, Julius Cohen and Ralph E. Dippell, Jr. continued operating the firm under the name Cohen and Dippell, at which time Cohen and Dippell, P.C. was formed. Donald G. Everist, an employee of that firm and its predecessor since February, 1961, joined the Corporation in January, 1973. In January 1988, the corporate name was changed to Cohen, Dippell and Everist, P.C.

COHEN, DIPPELL AND EVERIST, P.C.

CONSULTING ENGINEERS

RADIO-TELEVISION

SERVICES PROVIDED

This firm provides professional engineering services to AM (both medium and high frequency) and FM radio broadcast stations and television stations, and wireless services together with microwave, MDS, ITFS, cellular radio, CATV systems and experimental authorizations, and to applicants for such facilities before the United States Federal Communications Commission. This firm is available to provide expert engineering testimony in formal hearings before the FCC administrative law judges, and other governmental bodies such as civil courts, city counsels, and zoning boards.

Besides our extensive U.S. practice, over the past thirty years, a number of our clients have been outside of the U.S.A. where our expertise also covers L.F., M.F., H.F., VHF, UHF, and microwave systems.

DOMESTIC

Our firm also maintains a number of computers, computer databases, and customized software for propagation and frequency studies. We have capabilities of developing computer programs for this firm's use to assist our clients for specific engineering projects. For example, the allocation analysis can be performed using the FCC OET Bulletin No. 69 dated February 6, 2004 and the FCC supplemental processing guidelines dated August 1998. The program used is the FCC Longley-Rice model code modified for an Intel computer with the Windows XP operating system. The results of this adapted program have been compared to other known FCC studies and have been found to give comparable results.

Another phase of our activity includes preparation of engineering exhibits for submission to the FCC. This work includes the provision of engineering advice in numerous related areas of activity; such as equipment studies and recommendations (new and used), appraisal for prospective buyers or existing operators, presenting testimony for FAA approval, studies for microwave and wireless systems and frequency studies for potential new types of communications. This firm

COHEN, DIPPELL AND EVERIST, P.C.

CONSULTING ENGINEERS

RADIO-TELEVISION

provides radiofrequency field strength measurements and RF spectrum, interference and power density studies for all types of stations. Radio frequency-power density computations and measurements are routinely undertaken by this office using state-of-the-art survey and field strength meters.

Another phase of our activity concerns the planning and design of facilities for AM, FM, and TV broadcast stations (Part 73), and wireless services (Part 27 and Part 101) including preparation of engineering exhibits for submission to the FCC. This work includes providing engineering advice in numerous related areas of activity such as equipment studies and evaluations (new and used), appraisal for prospective buyers or existing operators, presenting testimony for FAA approval, studies for microwave (Parts 74 and 90) and communications systems and frequency studies for potential new types of communications. The firm provides services for proof-of-performance on AM, FM and TV stations, field strength measurements, spectrum, interference and energy-level studies for all types of broadcast stations and related communication systems.

In the AM broadcast field, the firm's services consist of the design of multi-element antenna systems to meet FCC Rules and Regulations, and the adjustment and proof-of-performance thereof, to demonstrate compliance with the FCC authorization. This office has received FCC approval for more than two hundred such systems in the United States. The firm provides engineers to make field intensity measurements for the determination of measured coverage, conductivity, antenna efficiency, and the transmitter site location. Detailed studies of coverage and interference between broadcast stations, both groundwave and skywave, are provided. Service of professional grade regarding maintenance and repair of directional antennas is also provided.

COHEN, DIPPELL AND EVERIST, P.C.

CONSULTING ENGINEERS

RADIO-TELEVISION

INTERNATIONAL

The firm has performed technical planning services in Mexico, Panama, Israel, Venezuela, Netherlands Antilles, Bophuthatswana, Swaziland, Lesotho, Transkei, Republic of South Africa, Sri Lanka, Haiti and the United Kingdom.

PERSONNEL

Donald G. Everist is a registered professional engineer and a graduate of a recognized engineering school. Other members of our staff include secretarial, drafting and computer departments.

The individual resume of Donald G. Everist is attached hereto.

There also follows a list of companies and some of the broadcasting stations for whom we have performed professional engineering services.

RESUME FOR DONALD G. EVERIST

Donald G. Everist is a graduate electrical engineer, a registered professional engineer in the District of Columbia (Registration Number 5714) continuously since February 1967, and is President and Secretary of the firm of Cohen, Dippell and Everist, P.C., Consulting Engineers, Radio-Television, with offices at 1420 N Street, N.W., Suite One, Washington, D.C. 20005. He is a member of the Institute of Electrical and Electronic Engineers, National Society of Professional Engineers, Illinois Society of Professional Engineers, and a member and past president of the Association of Federal Communications Consulting Engineers.

He was the Chairman of the AM Broadcasting Service Working Group preparatory to the 1979 World Administrative Radio Conference and Industrial delegate for the United States to the International Telecommunications Union Regional Administrative Medium Frequency Broadcasting Conference in Buenos Aires, Argentina. He was the Chairman of TF:F Planning Methods; was a U.S. delegate on the Fourth Panel of Experts meeting in Geneva, Switzerland; was Chairman of the Working Group on Inventories, Incompatibilities, Negotiations and Strategy to the Advisory Committee, all preparatory to the Second Session of the Regional Administrative MF Broadcasting Conference for Region 2 (Western Hemisphere) held in Rio de Janeiro, Brazil. He was an industrial delegate for the United States to the Regional Administrative Radio-Conference (BC-R21) sponsored by the International Telecommunications Union in Geneva, Switzerland. He was an industrial delegate for the United States for the CCIR Joint Interim Working Party 8-10/1 Meeting in Helsinki, Finland.

November 2002 - Present

President and Secretary

COHEN, DIPPPELL AND EVERIST, P.C.

CONSULTING ENGINEERS

RADIO-TELEVISION

January 1993 - October 2002

President, Cohen, Dippell and Everist, P.C.

January 1988 - December 1992

Secretary-Treasurer of Cohen, Dippell and Everist, P.C.

January 1973 to December 1987

Formation of Corporation, Cohen and Dippell, P.C., with Donald G. Everist as Secretary-Treasurer.

January 1970 to January 1973

Engineer with the firm of Cohen and Dippell.

1961 to 1970

He was employed by George C. Davis, Consulting Engineers, Radio-Television.

During this time his responsibilities included AM, FM and TV interference and allocation studies, microwave and CATV systems; the design and adjustment of multi-element directional antenna systems for the broadcast field; field strength surveys for AM, FM and TV broadcast stations; and preparation of exhibits for submission before the Federal Communications Commission for construction permits, license and license renewal.

1956 to 1961

Attended Western Illinois University for two years in pre-engineering. Attended from 1958 to 1961 and received a BSEE from the University of Illinois.

EQUIPMENT OWNED AND MAINTAINED BY
COHEN, DIPPELL AND EVERIST, P.C., CONSULTING ENGINEERS

The consulting engineering firm of Cohen, Dippell and Everist, P.C. owns numerous signal strength meters for AM broadcast band use, field intensity meters for the measurement of VHF and UHF signals and broadband radio frequency exposure meters for the measurement of power density levels. Equipment also includes slotted lines, RF bridges, and impedance bridges, together with associated signal generators and detectors, and portable two-way communications systems used for antenna adjustment in the field.
